

QUALITY POLICY STATEMENT

Scope

This policy sets out the quality standard requirements of Stocks Group and its subsidiary operating companies, Site Service Engineering, Scotton Construction, Trent Lifting and Techniq Design. It covers all activities undertaken by our Group of Companies, throughout all office, workshop and client locations.

Purpose

Our IMS is designed to support continual improvement in the efficiency and effectiveness of our operations and conforms to the international standard ISO 9001:2015.

Statement

We are committed to maintaining and continually improving our Integrated Management System (IMS) that satisfies the requirements of the international standard ISO 9001:2015.

We will conduct our operations in accordance with our IMS and comply with all legislation, standards and obligations in the jurisdictions in which we operate.

Responsibilities

The Stocks Group Directors are responsible for the effectiveness of the IMS, its integration into business processes and ensuring sufficient resources for its continuing upkeep. They are responsible for the content and implementation of the policy and will assist each operating company by refreshing and reinforcing this policy via application, guidance and monitoring as appropriate.

Company Directors are responsible for taking measures to help staff act in compliance with this policy and ensure all personnel are versed in the requirements of quality management.

All staff are required to comply with this policy and share responsibility for our performance in implementing and improving it.

It is a requirement for the fabrication of structural steel to be covered by the EU standards for CE Marking, brought down into UK law with BS EN 1090:2015. Site Service Engineering will be certified to 1090 Execution Class 2 for structural steel fabrications.

Implementation

We maintain our Management System using a process and risk based mindset, controlling and documenting health, safety and environmental processes. Our documented system defines processes and procedures that enable us to provide services that consistently meet client and other statutory and regulatory requirements.
